5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujii et al.

Regarding claim 15, Fujii et al. show a bearing structure having a hydrodynamic gas bearing (Figure 1), comprising:

- Fixed components (12, 16, 26); and
- Rotatable components (2, 36, 38) which are supported by the fixed components for rotation,
- Wherein the fixed components and the rotatable components are kept in non-contact state during rotation of the rotatable components,
- The bearing structure further comprising a conductive structure (68, magnetic fluid, 16) having a magnetic fluid (column 5, line 10-20) for electrically connecting the fixed components and the rotatable components either in the region where there is no air flow generated by suction or discharge of a gas for generating hydrodynamic pressure at the hydrodynamic gas bearing portion, or in the region where the air flow is negligible.

Regarding claims 16 and 17, it is noted that Fujii et al. also show a spindle motor and a hard disk drive having the spindle motor.
